

Oshman Family Jewish Community Center (OFJCC) - 397.5kW Solar Installation Completed

[Watch](#) a short clip on the the newly installed solar system at the Taube Koret Campus for Jewish Life. The system will supply about 20% of their energy needs. A total of 1,840 Trina Solar PA05.002-250W modules were used and it will save the OFJCC \$1.5 million over the 20 year contract. The solar installation also helped the Taube Koret Campus for Jewish Life achieve a LEED Silver rating for the entire complex.

Trina Solar Achieves Anti-PID Ability for all Self-Produced Solar PV Cells

All Trina Solar PV cells have achieved anti-PID (Potential-Induced Degradation) ability following the optimization of the Company's manufacturing technology. [Learn more.](#)

Trina Solar and ANU Jointly Develop High Efficiency Solar Cell

An IBC silicon solar cell was developed, which was independently tested by the Fraunhofer Callab in Germany to be able to deliver an efficiency of 24.4%, putting it among the most efficient solar cells to date. [Learn more.](#)

Trina Solar Awarded EPC Contract for Jordan's Largest Solar Power Project

Trina Solar has signed an EPC contract with Fresh Fruits Company, a food storage and logistics company in Amman, Jordan, for a 2 MW rooftop solar power plant on the company's stores and warehouses. Under the contract, Trina Solar is responsible for the engineering, procurement, and construction of the project. The project will use Trina Solar TSM-PC05A Honey 260 Wp, high efficiency modules that adapt well to dry and high temperature conditions prevalent in the Middle East. [Read more.](#)

TrinaSolar Partner Plus⁺

An exclusive program for Trina Solar rooftop installers nationwide. The Partner Plus Program leverages the full strength and resources of our global manufacturer along with the award-winning Trina Solar panels and innovative Trinamount systems to help installers grow their solar business.
